Video Instructions

Easy Start Guide

Download the Sensi app before you begin

The free Sensi mobile app is available on the App Store™ and Google Play™. Simply search for “Sensi” and download to your device to get started.

1 Create your account

Open the Sensi app on your device and follow the prompts to create an account, using a valid email address. Your Sensi account can only be linked to one email address, but you can share your account information across devices so your whole family can have access.

2 Thermostat installed

Your TRC assessor will install the thermostat for you. You will be responsible for downloading the app on your smartphone and following the step-by-step directions.

3 Connect to Wi-Fi

The Sensi app will walk you through connecting your thermostat to your Wi-Fi network. You will need to scan the Sensi code located in the documentation included in the box with your thermostat. You will also need your Wi-Fi network name, password and Sensi password.

4 Register your thermostat

Finally, the app will walk you through registration so you can start controlling your home comfort. Anytime. Anywhere.

Features

Smart alerts

Get notified of issues like extreme temperatures, humidity, or system failures, even when you're away, so you can act quickly.

Keypad lockout

Lock thermostat controls with the Sensi app to prevent changes. A padlock icon on the display shows it's app-only adjustable.

Early start

Ensures your home reaches your desired temperature by the time you need it, without guessing.

AC protection

Delays cooling for five minutes after being turned off and back on to prevent equipment damage. The set temperature flashes on the display when active.

Circulating fan

Keeps air flowing when the HVAC system is off, helping regulate temperature and reducing particle buildup.
